WINDOW WORLD

ComfortWorld Windows and Patio Doors

Window World's 50,000 square foot corporate office and training facility in North Wilkesboro, North Carolina.

Welcome

WELCOME TO THE WINDOW WORLD FAMILY.

Window World Tops 2012 National Remodeling Rankings.

Our Story.

It all began in 1995 with the unique vision and energetic passion of one man's dream – to develop a home improvement company with a moral compass like no other.

He would offer only the finest quality products, professionally installed with distinction and integrity – and do so at the lowest possible price. Quite simply, the best for less.

He set out to break the mold and change the remodeling industry. And did he ever.

Today, we are America's Largest Replacement Window Company. We are proud to bring you beautiful, world-class quality products from industry-leading manufacturers of windows, siding and other professional-grade exterior building materials. Our manufacturing partners demonstrate a proven record for superior craftsmanship, enduring quality and genuine value. Their professionalism and expertise are further assurance you have made an excellent selection for your home.

We also take pride in our companywide commitment to customer happiness. From start to finish, our knowledgeable and friendly team is ready to serve you with the exceptional customer care and attention to detail you can expect from the Window World brand.

Window World Named Number One Window Company in the Country.

Window World has been ranked the number one window company in the United States by Qualified Remodeler's 'Top 500' and the number one replacement contractor nationwide in Remodeling Magazine's 'Remodeling 550'. Window World was also named the third largest remodeling company overall by Qualified Remodeler, only being topped by two national insurance restoration companies.

Our Promise.

We do our best on every job, every day, because at Window World we know that a great job today will bring referrals from family, friends and neighbors tomorrow.

Our promise to you is straightforward: superior products, professional installation, guaranteed low pricing – *simply the best for less.* Welcome to Window World.

Tammy Whitworth
CEO, Window World

A Smart Investment.

For most people, a home is not only a source of enjoyment and pride, it's also their largest investment. Maintaining and improving your home with premium quality replacement windows can help protect this investment while also enhancing its appearance both inside and out. When windows are in poor condition – with foggy glass from seal failure or decaying frames with peeling paint – they create a dilapidated look that detracts from the overall curb appeal and value of a home. With new Window World Windows your home will have a fresh, energy-efficient, low-maintenance solution backed by an all inclusive lifetime limited warranty.†

Portfolio of Options.

Once you decide that new windows make sense, the next question is 'what type'? There are several choices . . . aluminum, wood, wood clad, fiberglass or vinyl. While many of the options offer a great initial appearance, they may also have some downsides. For instance, wood is beautiful but it is also expensive. And while wood windows have an attractive appearance initially, a few years later you are again faced with routine maintenance to keep them looking fresh. Vinyl windows are an option that will provide you with a beautiful view today and for the future. Their performance and maintenance-free characteristics make it the most popular type of residential windows sold today – with a market share of over 68% and growing.**

A Great Return.

We know that replacing your windows can help save money by increasing energy efficiency, but what do they add to the value of your home? According to Remodeling Magazine's 2011-2012 Cost vs. Value Report, vinyl windows recoup an average of 68% of the initial investment . . . making this home improvement project that pays in both comfort and return.

** According to the 2010 Freedonia report

Our Window World Design Showcase will help you choose the most attractive products for your home. Available online or as a tablet app.

AMERICA'S LARGEST REPLACEMENT WINDOW COMPANY

Simply the Best for Less

America's Largest Replacement Window Company.

It's not just a motto – it's a fact. Ask the industry's trusted national trade publication that ranks remodeling companies, *Qualified Remodeler*. They've rated Window World at the top. *What does this mean to you?* It means you benefit from our powerful nationwide network of over 200 locations. It means you can always count on us and our promise. It means we bring quality, value and honesty to homeowners everywhere – and that you become part of our satisfied homeowner family.

Ultimately, it means you benefit from our world of premium replacement products that beautify your home while boosting energy efficiency, performance and home value.

ENERGY STAR® Retail Partner.

Make no mistake about it – the ENERGY STAR® label on qualifying Window World products means you can rest assured they meet stringent standards for energy efficiency. Perhaps most noteworthy is that Window World is a true ENERGY STAR Retail Partner!

Good Housekeeping Seal.

Want more proof of Window World quality? Then take comfort and pride in knowing our entire line of Window World Windows carry the prestigious Good Housekeeping Seal of Approval by the Good Housekeeping Research Institute. Only those products that pass the Institute's evaluation are eligible for the Good Housekeeping Seal. No small feat indeed, considering Good Housekeeping stands behind all Seal-bearing products with a refund or replacement warranty!

Dynamic Charitable Foundations.

Window World Cares, our charitable foundation, was formed to help those in need. By aligning with charitable organizations at both the national and local levels, we are fulfilling our late CEO, Todd Whitworth's passion of "giving back" to the community. This is truly a core belief within the Window World Family – and always will be.

We are an active national partner with St. Jude Children's Research Hospital, a first-class hospital known for cutting-edge pediatric cancer research and treatment. Our caring employees nationwide generously donate to St. Jude's cause. We're proud to support this wonderful organization that never denies a child treatment because of a family's inability to pay. We have also established a Window World Customer Cares program where you too can donate to this incredible organization.

Our work with the Veterans Airlift Command allows us to help provide free air transportation to wounded veterans and their families for medical and other compassionate purposes by volunteering both aircraft and pilots to this worthy cause.

Quite simply, Window World is committed to helping others in need, and we humbly value your support in these efforts.

Event Sponsor.

Window World is proudly involved in several professional motor sports partnerships – thus exposing people everywhere to the unique Window World family. It's a great opportunity to share our message of value and quality with our fellow Americans, while sponsoring family fun events like NASCAR and Indy Car Racing.

IT IS THAT EASY BEING GREEN

It's Easier Than You Imagine to Go Green When It Comes to Your Home.

Perhaps when you think of green building, it requires installing solar panels and building with products derived entirely from recycled materials. Actually, it's as simple as choosing a quality vinyl window, such as Window World Windows.

The U.S. Green Building Council (USGBC) established the Leadership in Energy and Environmental Design (LEED) Green Building Rating System to encourage and accelerate green building practices across the building industry. LEED for Homes is the nationally accepted benchmark for design and construction in the housing market.

According to LEED for Homes, there are several criteria that make a home green: energy efficiency (the home uses less energy and natural resources), material selection, and an indoor environmental quality that is healthier and more comfortable to the occupants than traditional building products (i.e., less exposure to mold, mildew and other indoor toxins, and reduces outside noise).

Window World Windows are the smart choice when considering green building practices because they meet the high standards and criteria set by LEED.

*Window World
makes being green
easier than you could
ever imagine when it
comes to your home.*

It's all part of Window World's commitment to being green and helping you create a home that will provide beauty and security for a lifetime of enjoyment.

With Window World, You'll Use Less Energy and Conserve Natural Resources.

According to the Vinyl Institute, the selection of vinyl windows over less energy-efficient window frames saves enough energy to meet the annual electricity needs of 20,000 single-family homes.

The multiple layer, low-emissivity (Low-E) glass used in the SolarZone™ Insulated Glass Package is substantially more energy-efficient than a clear insulated glass package. While it helps keep your home warmer in the winter and cooler in the summer, it also helps protect the environment by reducing the consumption of fossil fuels.

Less Waste, More Product.

Vinyl can be reprocessed and recycled repeatedly, so scrap from our manufacturing process can be recycled into other vinyl products, helping make it a resource-efficient operation. The durability of uPVC also creates an environmental advantage. The longer a product lasts, the less energy and other resources must be utilized to make replacement products.

A Green Home is a Healthier Home.

The warm-edge spacer systems available in Window World Windows are up to 16 degrees warmer at the edge of the insulated glass unit, making them more efficient than standard metal spacers. This in turn, helps to reduce condensation, which leads to mold and an unhealthy environment.

Be eco-friendly. Choose Vinyl.

Vinyl windows are recognized as an environmentally preferable product. Here are a few reasons why:

- The leading component in the production of vinyl is common salt, an inert natural resource. More than half of vinyl's PVC resin is derived from salt, a sustainable resource.
- Vinyl window products generally weigh less than other substrate window products, requiring less energy consumption during transportation.
- Information from the National Association of Home Builders (NAHB) indicates vinyl windows should last a lifetime, therefore they will not need to be replaced, reducing the need for new materials.

A WINDOW TO SUIT EVERY NEED

Masterfully crafted with attention to every detail, Window World Windows are available in a full selection of styles to let you design the ideal window system for your home.

Window World 4000 Exclusive Features:

- Fusion-welded sashes and mainframe for added strength and rigidity.
- Beveled exterior mainframe for a clean, elegant look.
- Hidden screen track for clean lines and added beauty.
- Sloped sill forces water to drain to the exterior of the window.
- Double barrier weather seal at sash perimeters help keep out dirt and protect against air infiltration.
- Protective bulb at the sill seals out dust, dirt and air infiltration.

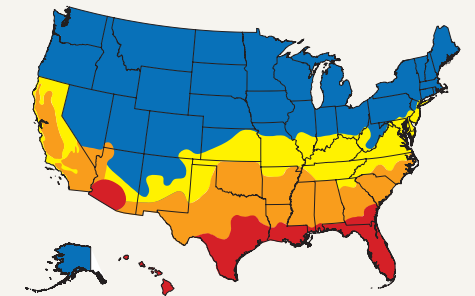

Window World 6000 Features:

- Fusion-welded sashes and mainframe structure add strength and rigidity. Multiple extra-thick extrusion walls provide additional durability and insulation to the window frame.
- Beveled exterior mainframe and sash and hidden screen track for added beauty.
- Double lift rails provide strength and stability for easy operation.
- Quad-4 weatherstripping at the header for added protection from the elements.
- Triple-barrier weatherstripping provides superior protection against dirt and air infiltration.
- Sloped sill enhances protection from the elements.

ENERGY STAR U.S. Climate Zones

Window World offers a variety of ENERGY STAR qualified glass packages specifically tailored to your climate zone.

The Following Features are Standard on all Window World Windows.

- Vinyl frame and sashes are made tough and solid with a uPVC compound that will never chip, peel, crack or warp.
- Multi-chambered sash and mainframe for superior thermal efficiency.
- Intercept® Warm-Edge Spacer System maximizes performance and longevity.
- Interlock at sash meeting rails creates a super-tight seal against air infiltration while adding security.
- Drop-in glazing for extra protection from the elements.
- Fully extruded lift rails provide strength and stability for easy operation.

Plus These Additional Features:

- Dual vent stops for controlled ventilation and airflow.
- Full balance covers help protect against air infiltration while adding a finished appearance.
- Constant force balance system eliminates sash cords, weights and pulleys. You'll benefit from smooth, comfortable fingertip operation.
- Tilt-in top and bottom sashes make cleaning safe and easy from inside the home.

Enhance Your Windows with These Options:

- SolarZone Insulated Glass Packages featuring Low-E glass and the Intercept Warm-Edge Spacer System for enhanced insulating performance.
- Full or half fiberglass screens provide ventilation while keeping insects out.*
- Standard, contoured or brass grids are placed between the panes for easy cleaning.
- Specialty V-grooved glass for a truly custom look.

*Full screens are standard on exterior color-finished windows.

All Window World Windows are manufactured to the stringent testing guidelines set forth by the American Architectural Manufacturers Association (AAMA) and the National Fenestration Rating Council (NFRC).

The American Architectural Manufacturers Association is recognized internationally for the development of standards that provide third-party validation of product performance and quality. Because all Window World Windows are certified for structural, air, and water performance, as well as thermal performance, they bear the prestigious AAMA Gold Label.

The National Fenestration Rating Council establishes test criteria that set the standard for performance ratings of window and door products. These consistent ratings provide accurate information on the energy performance of windows, doors and skylights.

ENERGY STAR is a joint program between the U.S. Department of Energy (U.S. DOE) and the U.S. Environmental Protection Agency (EPA). It assists consumers in recognizing energy-efficient products and promoting the environmental and economic benefits of these products through labeling and other activities.

SOLARZONE™ INSULATED GLASS PACKAGES

Choose one of our SolarZone Insulated Glass Packages to enhance the year-round comfort of your home while maximizing energy savings.

HELP SAVE ENERGY AND THE ENVIRONMENT.

Upgrade Your Windows with Our SolarZone Insulated Glass Package.

Window World Windows are already designed for superior thermal performance. By choosing one of our SolarZone Insulated Glass Packages featuring Low-E glass, argon gas and a warm-edge spacer system, you can help reduce your energy use even more, while helping cut consumption of the fossil fuels that pollute our environment. Window World offers many ENERGY STAR qualified glass packages. Ask your representative for more details.

What Makes the SolarZone Insulated Glass Packages so Effective?

Since 80% of a window is glass, substantial heating and cooling savings come from improved glass performance.

- Our combination of UV-filtering Low-E glass, insulating argon gas and a warm-edge spacer system creates significant energy efficiency. Together they can cut damaging UV energy, which can lead to the fading of carpets, curtains and furniture by over 75%.
- The center of glass U-Value of SolarZone Insulating Glass is 50% better than standard insulating glass.
- In summer, up to a 58% reduction in solar heat gain helps reduce air conditioning costs.

The result: SolarZone Insulated Glass Packages can help you save on energy and cooling costs while keeping your home more comfortable.

Comfortable Rooms Start with a Warm-Edge Spacer System.

Warm-edge spacers are so energy-efficient that they keep the glass of the window warmer so your home feels more comfortable in the cooler months. Window World Windows offer two high-performance spacers which can help your home benefit from additional energy efficiencies.

The Benefits of the Intercept Spacer System.

The Intercept Spacer System features a unique, one-piece metal alloy, U-channel design that creates an effective thermal barrier to help reduce conducted heat loss through the window. Its sealed, one-piece design makes Intercept spacers stronger and better at retaining insulating gas than many conventional designs.

The Intercept Spacer System is nearly 25% more effective than a traditional box-shaped spacer at the edge of the glass unit.

The Optional Foam Spacer System.

The optional Foam Spacer System is unique in its patented design. By combining a structural foam spacer with a seal of hot melt butyl to create a non-conductive edge, the non-metal Foam Spacer System eliminates any metal to glass contact, thereby increasing the edge of glass temperatures by over 16 degrees, which proves to be over 60% more energy-efficient than a traditional box-shaped spacer.

Traditional Box-Shaped Spacer
Heat transfer through traditional box-shaped spacers, used to separate glass layers, can increase heat loss and cause condensation to form on the edge of the glass.

Warm-Edge Technology
A warm-edge spacer is designed to block the path of escaping heat far more efficiently than traditional box-shaped spacers. The result is reduced condensation on window glass.

The SolarZone Low-E Glass Package – Making the Difference.

A warm-edge spacer system is just one way of increasing your window's performance. SolarZone Low-E glass is an excellent option to help increase your home's comfort and energy savings year-round. SolarZone Low-E glass is created by applying a microscopic,

Heat Photographs (Infrared Thermography).

Standard Clear Glass SolarZone Insulating Glass

undetectable metallic coating to the second surface of an insulated glass unit. This coating helps to block heat gain in the summer while retaining furnace heat and allowing warm short wave solar rays in the winter.

The thermographs (left) clearly show the effect that Low-E glass has when contained in an insulated glass unit. The window on the left is a clear insulated glass unit. The heat transmittance, indicated by the green, yellow and orange colors from the heat scale, is far more apparent than that of the window containing the SolarZone Low-E insulated glass unit.

Low-E glass filters long-wave radiation from the sun. This reduces heat gain in the summer, keeping your home cooler.

Low-E takes on a new duty in winter months. It lets warm solar rays into your home while blocking the heat in your home from getting out.

SolarZone Insulated Glass Packages.

The optional SolarZone Insulated Glass Package combines multi-layered, vacuum deposition Low-E glass with argon gas and a warm-edge spacer system. These insulated glass packages have proven to be far more effective than ordinary clear glass units. The National Fenestration Rating Council (NFRC), in conjunction with the U.S. Department of Energy (U.S. DOE), developed a rating system for window product performance.

One of the most critical NFRC tests is for the window's U-Value, which measures a window's resistance to heat transfer. The lower the U-Value, the better the window is at resisting heat flow, which results in a window with a greater insulating value.

Another critical NFRC test measures the Solar Heat Gain Coefficient (SHGC). This procedure measures how well a window blocks heat caused by sunlight. Again, the lower the number, the less of the sun's solar heat the window transmits into the home.

A quick comparison will show that your choice of an optional SolarZone Insulated Glass Package will outperform clear or lesser Low-E glass packages, leading to increased energy savings.

DOUBLE-HUNG WINDOWS

Our Double-Hung Windows expertly merge timeless style with next-generation technology. The superb craftsmanship achieves a pristine appearance while protecting your home with a weathertight shield against energy loss.

Window World's exclusive cam action lock and keeper help add to your security.

Low-profile tilt latches and sash vent stops add beauty and functionality to the double-hung window.

Both sashes of Window World Double-Hung Windows tilt-in for easier, safer cleaning from inside your home.

The exquisite design of Window World Double-Hung Windows is the perfect choice for those who want a beautiful, classic appearance. Functional beauty, easy maintenance, energy efficiency and a wide selection of decorative options will help personalize your environment.

Showcase the beauty of the outdoors with the sleek design of our Double-Hung Windows.

SLIDING WINDOWS

CASEMENT AND AWNING WINDOWS

Casement and Awning Windows and their vast design options, both incredibly versatile windows, offer a transitional feel to your home. State-of-the-art engineering ensures easy operation year after year.

Window World Sliding Windows operate on two sets of solid brass tandem rollers.

Sash vent stops allow fresh airflow.

Sliding Windows combine the best of both worlds: form and function. The clean and innovative design provides easy operation and effortless control.

Great style comes to any interior design when Awning and Fixed-Lite Windows are combined.

Awning Windows feature a dual locking mechanism on each side of the window.

Sturdy stainless steel hinge system for years of trouble-free opening and closing.

BAY, BOW AND GARDEN WINDOWS

The sheer beauty of a Bay or Bow Window, with their smooth lines and detailed craftsmanship, can add an understated elegance to any room. By expanding your outdoor view, they are almost like a spacious addition to your home.

Extruded vinyl frames and sashes will never chip, peel, crack or warp.

1-1/4" furniture-grade veneer.

Optional 3" pre-insulated seatboard.

Head and seatboard in oak or birch veneer.

Adjustable turn-buckle cable hanging system.

Corian Seatboard Options.

Bay and Bow Windows are a beautiful way to add architectural interest to your home – both inside and out.

The Window World Garden Window offers an easy way to open up the visual space in any room. They invite the outdoors inside, adding sunlight and warmth without sacrificing comfort. And a deep 17" seatboard makes a great accent area.

SLIDING PATIO DOOR COLLECTION

FRENCH-STYLE SLIDING PATIO DOOR

Enjoy authentic “French door” charm but with the floor space-saving convenience of a sliding patio door. The 5" top rail, 7" bottom rail and 3" side rails further enhance the aesthetic appeal.

Our patio door collection celebrates the perfect alliance of artistic detail and performance engineering with three distinctive styles: French, Contemporary and Classic. Meticulously crafted for an upscale appearance, each door also boasts a powerfully protective and weathertight infrastructure built with world-class manufacturing expertise.

Form and Function – Where Every Detail Counts.

Inspired by the key fundamentals of product excellence, Window World Sliding Patio Doors are masterfully crafted for smooth and reliable operation, while also protecting your home from inclement weather.

Beginning with a premium vinyl construction, the heavy-duty mainframe and sash, multi-chambered extrusions and steel-reinforced interlocking meeting rails combine for superior strength and structural integrity. Increased thermal protection is achieved with dual internal/external weatherstripping, a compression bulb seal, closed-cell foam gaskets and a 1" thick insulated glass unit with a warm-edge spacer system – resulting in a tough shield against energy loss.

Easy-gliding door action is assured with a strong tandem roller system, while the rugged aluminum screen features four adjustable rollers for reliable operation year after year.

Decorative Handles.

The graceful contour of our French-Style Sliding Patio Door handles sets them apart. Each handle features a top lock for added resistance.
